

Poligof Mexico, San Luis Potosì, will start production earlier than scheduled

February 11th, 2022

We are very proud to announce that everything is ready to start industrial production in April, approximately one month ahead of the original plan.

We would be very happy to welcome Hygiene Companies at our facility, to identify their needs and discuss about a business relationship: please contact Ricardo Quintana, Poligof Mexico General Manager (r.quintana@poligof.com)
